Experience

UX Developer

[PennyMac](#)

October 2014-Present

[Pasadena, CA](#)

Currently working on an AngularJS project, that has a Ruby on Rails backend. Also worked on a major redesign of the primary public website to update its look and to make it mobile responsive, and created two new websites. The websites were built in LocomotiveCMS, a Ruby on Rails content management engine, using MongoDB, Liquid, SASS, Bootstrap, HTML5, AngularJS, Javascript and JQuery.

Software Engineer

[71 Pounds, Inc.](#)

June 2014 - October 2014

[Davie, FL](#)

Designed Ruby web crawling and scraping scripts and update legacy Python scripts that power the business. Involved in MySQL database design, SQL querying and reporting. Created new sections for the Rails website and integrated it with the PHP public site.

Web Designer, Marketing

[Center for Excellence in Dermatology](#)

March 2009 - February 2014

[Kennewick, WA](#)

Responsible for a Sharepoint and three Wordpress websites, plus social media. Increased web traffic by 250% using search engine optimization practices (SEO). Designed marketing collateral materials.

Photojournalist, Web Designer

[Wine Country Creations](#)

Oct 1998 - Dec 2013

[Tri-Cities, WA](#)

Sole proprietor of successful small business. Delivered news and travel photographs to the Associated Press, national and regional newspapers and magazines. Was the sole photographer on a book project. Designed websites, did page layouts and graphic designs as part of a multi-faceted business.

Training

Dev Bootcamp

[San Francisco, CA](#)

November 2013 - May 2014

Dev Bootcamp is an immersive programming accelerator for training full stack web developers with an emphasis in Ruby on Rails. Dedicated over 1000 hours to group and individual projects, coding challenges and self-guided learning.
