Experience

Application Developer October 2014-Present
PennyMac Loan Services, LLC Pasadena, CA

Currently working on an enterprise OAuth single sign-on solution built with Ruby on Rails. Recently helped architect and implement a new content-management solution for our marketing team's public websites that run on Ruby-based Jekyll platform that interfaces with CloudCannon's CMS service. These sites utilize Sass, Bootstrap, HTML5 and several APIs via Javascript and jQuery. Updated all our public sites to meet WCAG 2.0 AA standards for website accessibility. I've also had some limited experience working with React and Angular as well.

Software Engineer June 2014 - October 2014
71 Pounds, Inc. Davie, FL

Designed Ruby web crawling and scraping scripts and update legacy Python scripts that power the business. Involved in MySQL database design, SQL querying and reporting. Created new sections for the Rails website and integrated it with the PHP public site.

Web Designer, Marketing March 2009 - February 2014
Center for Excellence in Dermatology Kennewick, WA

Responsible for a Sharepoint and three Wordpress websites, plus social media. Designed marketing collateral materials.

Photojournalist, Web Designer Oct 1998 - Dec 2013
Wine Country Creations Tri-Cities, WA

Sole proprietor of successful small business. Delivered news and travel photographs to the Associated Press, national and regional newspapers and magazines. Was the sole photographer on a book project. Designed websites, did page layouts and graphic designs as part of a multi-faceted business.

Training

Udacity React Nanodegree July 2017 - October 2017

Learned how to build interactive, data-driven user web interfaces with React, and for iOS and Android with React Native. Also learned how to manage state in applications with Redux.

Dev Bootcamp November 2013 - May 2014
San Francisco, CA

Dev Bootcamp was an immersive programming accelerator for training full stack web developers with an emphasis in Ruby on Rails. Dedicated over 1000 hours to group and individual projects, coding challenges and self-guided learning.

Skills & Knowledge

Ruby	React	SQL
Ruby on Rails	Redux	APIs
HTML5	React Native	Agile Development
CSS3/Sass	Rspec	Pair Programming
Javascript	Capybara	Photoshop
jQuery	Git	Adobe Illustrator

Education

U.C. Berkeley

B.A. Psychology, Multiple Subject Teaching Credential
